## PROFILE

A proficient blockchain developer with 5+ years of experience, interested in contributing expertise in web and blockchain development.

Capable of excelling as part of a team or individually in a fast-paced environment.

Deeply knowledgeable in distributed ledger, blockchain security,

blockchain architecture patterns, and different blockchain standards and ecosystems.

I have experience developing DeFi, DEX, DApp, Trading Bot, Token,

autonomous systems and artificial intelligence. I am fluent in Solidity, Web3.js, Python and JavaScript, and have worked on a variety of projects as a consultant, helping clients achieve their goals.

I have a lot experience efficiently coding websites and applications

with modern Framework like Angular, React and Vue.

I am continuously trying to improve, learn more and gain new experiences.

## WORK EXPERIENCE

PROLOCALIZE, CTO

AUG, 2019 —PRESENT

Prolocalize - Thailand

Prolocalize is Thailand's most innovative and fastest growing company founded in 2017 with the aim of boosting the reach of businesses and information accessibility across the global community. We are a team of young talented experts with passion and dedication for helping companies to promote their businesses and reach a worldwide audience via the provision

of quality and speedy services with the aid of cutting-edge technologies. We observe a high standard of professionalism by cultivating a strong work ethics geared towards continuous research and development. Our work principle is quality-focused and our management system supported by ERP is

compliant with PMBOK, ISO 17001:2015, ISO 9001:2015 and GDPR 2016/679.

In this company I have workend in ML such as ,NMT,AutoML,and so on. I have developed our own translator and make one translator platform for company work with AWS Amplify + Angular.

And when I have some part time I developed some services for marketing youtube downloader,transcriber and so on.

The company live site is <https://prolocalize.com> but it is on maintenance now.

We are trainging with big data now.

## LUCKY SHIBA, CTO

AUG, 20 2 1 —PR E S E N T

Lucky Shiba - United Kingdom

And from last year I have worked Luckyshiba company.

It is Engliand company and the site is <https://luckyshiba.org/>

It is Blockchain game company.

We are developing shooting game and all are ready to lunch game.

In this company I was solidity developer.

So I have worked from token deploy and game logic with solidity.

You can check our company members from <https://docs.luckyshiba.org/team>.

## FULLSTACK DEVELOPER

2019-2021

<https://prolocalize.com>

This site was developed in wordpress by old developer.

I have updated this site to react and added NMT translator such as google translator.

The backend was developed with python django.

And the frontend was develope with react.

Now we are training more and more languages.

Also there is task management system such as smartcat.

It will be very popular in few years.

## BLOCKCHAIN DEVELOPER-DEX JAN,2021-FEB,2021

<https://rskswap.com/>

Uniswap dex site.

Deployed router solidity contract to ETH network.

And developed site with react and interact to contract using web3js.

## BLOCKCHAIN DEVELOPER-DEX JUL,2021-AUG,2021

<https://admin.usth.finance/>

Pancakeswap dex site.

I deployed PRX token on BSC network.

Deployed router solidity contract to BSC network.

So this is dex site for only PRX/BNB pair.

I developed site with react and interact to contract using web3js.

## BLOCKCHAIN DEVELOPER-STAKING

MAR,20211

<https://bnbstaker.xyz/>

This is BNB staking site

So If any user will deposit bnb then they will get reward with bnb.

As you can see from the site there are 3 plans.

14days lock plan,21days lock plan,28 days lock plan.

# EDUCATION

## Master's Degree

### King Mongkut's University of Technology Thonburi

AP R , 20 1 3 — MA R , 20 1 8

I graduated from King Mongkut's University of Technotlogy Thonbun.

King Mongkut's University of Technology

Thonburi or colloquially "Bangmod is an

engineering and technology university in Thailand

In this university I mastered in Computer sience.

So my software development was started from university.

In the university I learned web and Machin Learning.

So I worked easily in Porolocalize company after leave the university.

## Bangkok Patana School

Apr, 2011— Mar, 2013

Thai Solutions School in Bangkok

I have studied at Thai Solutions School in

Bangkok for 2 years.

There are about 3 courses in the school and to graduate school, I should pass these courses.

I learned basic programming and mathematics in this school.

I love my school.

So users can withdraw the bnb that they deposited in  
14days,21days,28days.

The reward percents are different too.

## **NFT MINT MARKETPLACE SITES OCT,2021-NOV,2021**

<https://nft-mint.org/>

<http://www.soulhero.io/>

First site is only NFT mint site.

It uploaded image to IPFS and call mint function in the  
EERC712 contract that is deployed before.

And second is Solana Nft marketplace.

So in that site,you can mint NFT,list nft that you minted,buy  
and sell NFT, and auction method.

So users can bid the price for the NFT and admin can accept  
highest price

## **CASINO GAME PLATFORM DEC,2021-APR,2022**

<https://game.babylonswap.finance/>

Current game platform is working in BSC

But If anyone want this game to work with their token I can  
try in 1 hour.

For this game we need 3 types of programs.

First we need game platform or we can say backend.

And second we need to build current individual unity game.

And third we need to load unity game and integrate with our  
platform.

## **FORKING BLOCKCHAIN DEC,2021-MAR,2022**

Deamchain developement.

<https://deamchain.com/>

I have forkend FTM ,made exploer,dex,bridge,and farming and  
staking platform.

Deamchain is a fast ,high-throughput opensource smart  
contract platform for digital assets and dApps.
